Review of the Operational Mechanism of Procuratorial Joint Conference System

ZHAN Jianhong CUI Wei

Abstract: As an essential part of the responsibility of procurators, the arising of joint conference system of procurators has become an important carrier of the reform of the operational mechanism of the procuratorial powers. The empirical research shows that the joint conference system may damage procuratorial independence by overemphasizing the crucial importance of attorney general-on-procurator supervision. Besides, the forming and running of the joint

conference system cannot guarantee the forming of high-quality opinions. Concerning the development of the system, procuratorial organs should strictly limit its performing range, and launch the process of remodeling from cases distribution, cases source, procedure structure and the scope of deliberation.
